

**2010 Nick Simons Scholar of the New Investigators in Global Health**

**goes to**

**DR.MOHAMMAD MAINUL ISLAM**

Mohammad Mainul Islam, PhD is named as a *2010 Nick Simons Scholar* of the New Investigators in Global Health (NIGH) of the Global Health Council (GHC). With the goal of bringing New Investigators in Global Health from the United States and from developing countries together in a positive working relationship, Dr. Mohammad Mainul Islam and Stan Wang have been chosen as the *2010 Nick Simons Scholars* based on their research in child health and survival. The NIGH program is a competitive abstract submission and selection program designed to highlight exemplary research, policy and advocacy initiatives of new and future leaders in global health, and empower participants with global health advocacy skills. The program also provides the selected participants with the opportunity to make presentation at a major international conference. Dr. Islam's abstract titled *Under-Five Childhood Mortality and Survival Dynamics in Bangladesh* has been selected from more than 335 scholarly submissions for presentation at the 37<sup>th</sup> Annual International Conference on Global Health: *Dateline 2010: Global Health Goals and Metrics*, June 14-18, 2010, Washington, D. C, USA. As a New Investigator in Global Health Dr. Mohammad Mainul Islam has attended and participated in a full week of activities of Council's Annual event- career development sessions, a special networking reception, the Annual Awards Banquet, and advocacy skills training led by leading global health advocates.
